**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 17-29, drawn to a voice mail converter in class 379, subclass 88.16.

II. Claims 49 and 51, drawn to a process of monitoring the on-hook and off-hook status of POTS telephones, classified in class 379, subclass 207.04.

2. The inventions are distinct from each other because of the following reasons:

The invention of Group I doesn't require monitoring the on-hook and off-hook status of POTS telephones and the invention of Group II doesn't require voice mail conversion.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

Art Unit: 2645
